Professional experience

Atomchat

Remote

Product Designer on Saas

- Designed Smartons, an AI-powered Flowbuilder component replacing complex branched flows with prompt-based conversational agents.
- Designed the Knowledge Base module for Smartons, including data structure guidelines and upload validations for AI-ready sources.
- Built and documented 10+ design system components with token architecture and rich HTML specs.
- Led UX research using SUS surveys and moderated Maze sessions across core modules.

Hapi app

Remote

Product Designer

- Designed the end-to-end Deposits flow (ACH + card) including recurring deposit logic with Coinflow integration.
- Designed the investment portfolio dashboard: charts displaying total invested amount, available balance, and asset distribution by stock/instrument, alongside key metrics such as historical total invested and total returns.
- Architected design token structure for the design system, enabling consistent theming and scalable component management.
- Leveraged vibe coding skills to build components directly in the codebase and submit PRs, ensuring pixel-perfect design-to-development fidelity across the design system.

n1co technologies

El Salvador, San Salvador

UX UI Designer

- Led UX/UI for Loyalty 2.0 (co1ns): designed rank progression, cashback boosts, and Activity Points flows.
- Designed Split and Credits features from 0 to handoff.
- Migrated component libraries and managed the design system using Atomic Design methodology.
- Conducted user research: tests, interviews, and surveys to validate and iterate on key flows.

Siman.com

El Salvador, San Salvador
